USE OF COOKIES AND OF THE ACTIVITY FILE

The lender by himself or a third party contracted for the rendering of measurement services, can use cookies when a user navigates through the website. The cookies are files sent to the navigator through a web server with the aim of registering the user's activities during his navigation time.

The cookies used by the website are only associated to an anonymous user and his computer, and do not provide themselves the user's personal data.

Through the use of the cookies, it is possible that the server where the web is recognizes the web navigator used by the user so that the navigation is simpler, allowing, for example, the users that have previously registered to gain access to the areas, services, promotions or competitions exclusively reserved to them without having to register in every visit. They are also used to measure the audience and traffic parameters, to control the progress and number of entries.

The user has the possibility of setting his navigator to be warned of the reception of cookies and to prevent their installation in his equipment. Please, see the instructions and manuals of your navigator to extend this information.

To use the website, it is not necessary that the user allows the installation of the cookies sent by the website, or the third party acting on his behalf, without the prejudice of being necessary that the user start a session as such in each of the services which provision requires the previous registration or "login".

The cookies used in this website are, in any case, of temporary nature with the only aim of making more effective its ulterior transmission. In no case the cookies will be used to gather personal information.

IP ADDRESSES

The servers of the website will be able to automatically detect the IP address and the name of the domain used by the user. An IP address is a number automatically assigned to a computer when it connects to Internet. All this information is registered in an activity file of the server duly inscribed allowing the subsequent processing of the data in order to obtain only statistical measurements that allow learning the number of prints of pages, the number of visits made to the web services, the order of visits, the access point, etc.
